DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 10-18-06 has been entered. Claims 21 and 23-26 are pending.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 24-26 rejected under 35 U.S.C. 102(b) as being anticipated by the Arimoto et al reference (US Patent 5,610,533).

Arimoto discloses in figures 18, 23 and 24 an apparatus comprising a substrate 61 in which a circuit of fig. 24 exists, and a power supply system 81-82, 83-84 and 86-87 of device 88 (e.g., details are shown in figure 23) supplying a potential of said substrate, said power supply system switching power supply to said substrate between a first case in which the substrate potential satisfies a first voltage condition in the forward direction with respect to the conductivity of source-drain of a transistor and a second case in which the substrate potential

Art Unit: 2816

satisfies a second voltage condition of a value smaller than that of the first voltage condition (See col. 20, lines 28-48) as required by claim 24.

As to claim 25, details of the body bias switching circuit 88, shown in figure 23, comprises a control circuit 85 transmitting a control signal #Ø to said power supply system which is provided inside the semiconductor device (i.e., all components are fabricated on the same substrate of the semiconductor device as shown in figure 18), said power supply system is shown to receive said control signal from said control circuit to supply power to a group of the desired circuits (Q51-58).

As to claim 26, col. 20, lines 28-48, discloses said first voltage condition is selected when said circuit is in an active condition, and said second voltage condition is selected when said circuit is in a standby condition.

Response to Arguments

4. Applicant's arguments with respect to claims 24-26 have been considered but are moot in view of the new ground(s) of rejection.

Allowable Subject Matter

5. Claims 21 and 23 are allowed.

6. The following is a statement of reasons for the indication of allowable subject matter:
See previous Office Action for reasons to allow independent claim 21.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
